AWIM training was all about making a Jet Toy based on Physics and Mathematics through a kit designed by SAE International /SAE India . This kit material required to make a concept car which runs on compressed air by means of a balloon motor .

The kit consists of chassis sheet, wheels, axle, bearings, scissor, scale, balloons, rubber bands etc.

Teachers and student volunteers were divided in groups of four each. In a group there were two Test Engineers, one Project Engineer and one Facility Engineer.

Under the guidance & training of Mr. Padmesh from Mahindra, teams made and tested the jet toy, teachers learned teaching technique to train students in line with Industry standards. Over and above, each group finally presented their toy & chart papers with a logo & slogan for their concept cars.

Now the trained student volunteers & teachers are ready to train school students and make them learn concepts on Automobiles which will make us achieve our Automotive Mission Plan -2016

The Eastern Zonal State level completion between 15 teams (3 best teams from each of the 5 school) is scheduled on 23rd week of October '2011 .The final three teams selected from the Event will represent National Olympics in Delhi on 13th Nov'2011

Hope Eastern Zonal AWIM under the patronage of MCKVIE & KISWOK Industries (P) Ltd and support of Mahindra & Mahindra Ltd will add to the Success stories of SAE India in years to come .

THANK YOU
